

Project: Fly

Our client, ABC Ventures, is examining the acquisition of ESV Inc., an experienced manufacturer of electric service vehicles, by one its high-tech portfolio companies that has just patented proprietary drone technology and needs a platform to quickly deliver units to fulfill US DOD contract. You have 21 days to provide an analysis of ESV's EHS and Sustainability performance along with estimates related to current liabilities and opportunities for improvement. The list of facilities follows. Your project manager will provide you with the necessary contact information to get started.

<u>Facility</u>	<u>Activity</u>	<u>Division</u>
